

Adil Mehmood

(International Master Students Tutor)

Hi, my name is Adil Mehmood, and I am International Masters Student in Sustainable Chemical and Process Engineering in Abo Akademi University. I am from Pakistan. My experience of studies in Finland has been amazing so far. I loved the cool and cozy nights of winter in Turku as well as vibrant summer days. My experience with senior international students and tutors has been amazing and I am here to give the new international Master students a sense of homecoming as well. I am looking forward to meeting all of new students

I love roaming around in city and walk through the old and new city buildings. My other hobbies includes cooking as well as watching seasons.

I warmly welcome all new Master Students and wish you best of luck with your new educational journey.
